For Windows Users   For Mac Users

3.Launch a browser from your computer or smart phone and enter http://wavlogin.link in the address field not search bar. Follow the Detailed Guide to finish the configuration.

For the guide of Repeater, AP mode configuration and other functions, please scan the QR code on the cover for the detailed guide.

Q1. Why doesn't the login page appear after entering http://wavlogin.link ?
  - Please make sure your computer is set to obtain an IP address automatically.
  - Verify if http://wavlogin.link is correctly entered in the web browser.
  - Use another web browser and try it again.
  - Reboot your router and try it again.

Q2. What can I do if I cannot access the Internet?
  - Please check if the Internet is working normally by connecting a computer directly to the modem with an Ethernet cable. If it is not, contact your internet service provider.
  - Open a web browser, enter http://wavlogin.link and run the quick setup again.
  - Reboot your router and try again.

Q3. How can I restore the router to its factory default settings?
  - While the router is powered on, press and hold the RESET button of the back for more than 6 seconds.

Q4. What can I do if I forget my Administration Management password?
  - Refer to FAQ > Q3 to reset the router.

Q5. What can I do if I forget my wireless network password?
  - Log in the router's web management page at http://wavlogin.link and go to Wireless, you can find your Wi-Fi password here.

Q6. How to deploy the router to get the best Wi-Fi signal?
  - Keep the router in the most central spot in your home and away from anything that might block its signal.
