WL-WN922BE3M  WAVLINK (@WavlinkOfficial)  WAVLINK SUPPORT (@wavlinkTechSupport)

Introduction

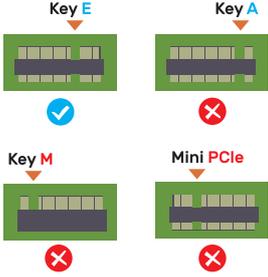

Wavlink triple band M.2 module is a BE6500 wireless adapter for laptops that has the NGFF/M.2 connector. It has the MLO feature that effectively reduces signal interference and transmission delays, providing a faster and more reliable wireless networking experience. Wavlink M.2 module supports MU-MIMO technology, making the wireless signal faster and more effective by cooperating with a MU-MIMO compatible router. Compliant with 802.11be specification the, module supports 2.4G, 5G and 6G bands with maximum data transfer rate 6500Mbps.

In the Box

- 1x WiFi 7 BE6500 M.2 Module
- 1x Quick Start Guide
- 1x Screwdriver

System Requirements

- Microsoft Windows 11 64 bit
- Laptop with M.2 Key E Slot

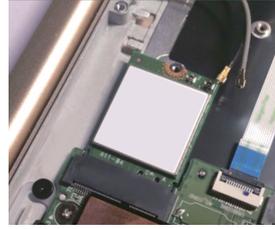

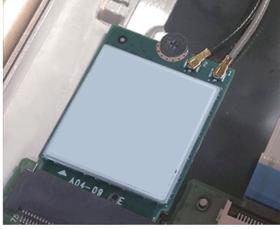

Note:

- Compatible with standard M.2 Key E slots, Windows 11 64-bit laptops only.
- Some laptops are hardware locked by default, please contact the laptop manufacturer for assistance in updating the BIOS.

Installation

1. Turn off the power of your laptop.
2. Please carefully unscrew the backshell of your laptop and find the wireless module.
3. Now, uninstall the old adapter.
4. Insert the new adapter and install antennas.
5. The installation process is completed, you can now test if it works normally.

Driver Setup

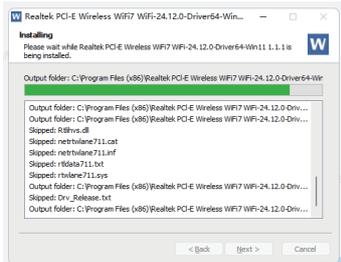

After installation, please visit the following website to download the latest driver for PCI-E adapter.
www.wavlink.com > SUPPORT > Driver > Wireless > PCI-E Adapter > WL-WN922BE3M

1. Unzip the file to find "Realtek PCI-E Wireless WiFi7 Wi-Fi-24.12.0-Driver64-Win11.exe". It is for Bluetooth /Wi-Fi connection. Please double-click it for driver setup.

2. Click "Install" to start the installation, then wait patiently for the installer to complete the setup process.

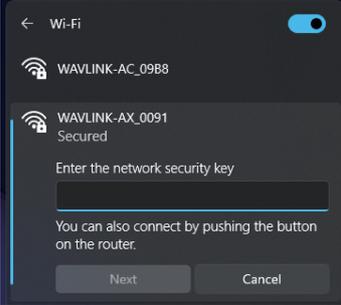

3. After the installation is complete, please click "Finish".

Wi-Fi Configuration

- Step 1:** When the computer turned on, insert the wireless card into an open USB port.
- Step 2:** Left-click network icon in the task bar to turn on the new WiFi.

Windows 11

NOTE: Firstly you need to find the right WLAN name of your WL-WN922BE3M then you can set it up if necessary, you can also change the name in "Network Connections".
