LED Light: Indicate the network connection status. Solid when connected to the network Flashing when disconnected.

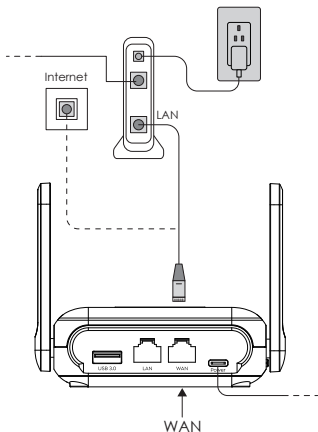

Reset Button: Press and hold it for 6s to reset the device.

Connection

1. Connect the USB-C power adapter to the Router, then wait for the router to finish booting up.

2. Connect the WAN port to DSL/Cable Modem or the Ethernet wall outlet.

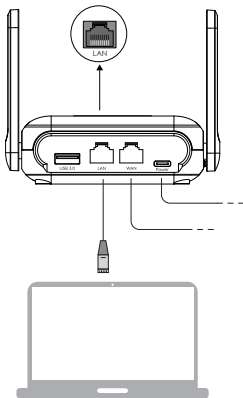

3. Connect to the device via Wireless or Wired connection

(1) Wireless Connection

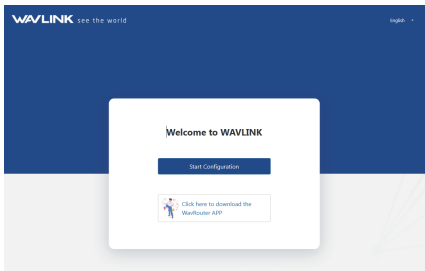

Connect to the router's WiFi SSID(on the bottom of the router).

(2) Wired Connection

Disconnect or Turn Off WiFi on your computer to prevent conflicts in network processing order, then connect it to router's LAN port via an Ethernet cable.

4. Open a browser and enter 192.168.20.1 or <http://wavlogin.link> in the address bar, click **Start Configuration** .

5. Select the **Country/Region** and **Time Zone**, then set the **WiFi name** and **password**, and you can keep the device management password same as the wireless password, after the above configuration, click **Save**.

Country code/time zone

Country/Region

Time Zone

Wi-Fi settings Dual-band convergence ☒

Wi-Fi name Same name for 2.4G and 5G Wi-Fi

The setting is successful, please wait for the setting to be completed, and then use the new Wi-Fi password to connect to the Wi-Fi

Wi-Fi name : WAVLINK_5858

Wi-Fi Password : *****

Scan the QR code to download the Wavrouter APP for easier router management

1%.Please wait...

7. Customize network settings according to your needs.

The screenshot displays the Wavlink web interface with a dark blue header. The header includes the Wavlink logo and tagline 'see the world', and a navigation menu with icons for Home, Wireless, Network, Terminal, and More Settings. The main content area is divided into several sections:

- Wireless Settings:** A large light blue box on the left contains an illustration of a router and lists settings for 2.4G and 5G SSIDs. The primary SSID is 'WAVLINK_5858' for both bands. Guest SSIDs are disabled.
- Ethernet:** A section titled 'Ethernet' (disconnected) shows a table of network parameters.
- Repeater:** A section titled 'Repeater' (disconnected) with a 'Settings >' link.
- Multi-WAN:** A section on the right titled 'Multi-WAN' (Settings >) showing 'Multi-WAN mode' as 'Failure recovery', 'In use' as 'WAN', and 'Use Time' as '4m 28s'.
- VPN:** A section titled 'VPN' (Settings >) showing 'VPN server' and 'VPN Client' both as 'Off'.
- USB Status:** A section titled 'USB Status' (Settings >) showing 'USB Status' as 'Disconnected'.
- Client List:** A section titled 'Client List' (Guest List) with a table of connected devices.
