Driver Installation

The DisplayLink driver will be automatically installed when your Windows 10/11 host has connected to the Dock and is on the Internet, if the automatic installation doesn't happen, please enter the www.wavlink.com/en_us/WL-UG39DH2 to find and download the corresponding driver for this Dock and install it as the following steps:

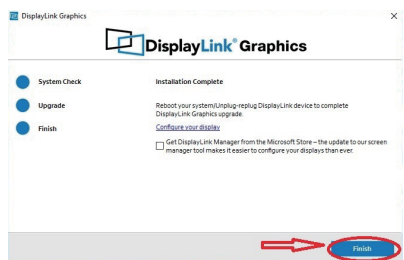

For Windows

1. Locate the downloaded folder and double-click the driver file you just downloaded.
2. If there is no DisplayLink Driver in your Windows computer, open the file and then follow guide to install the Driver. If your Windows host has ever installed the Driver, open the file and then click Upgrade.

4

3. Please wait patiently for the complete of the installation. After finishing installation, click **Finish**.

5

For Mac

1. Double-click the driver file you just downloaded, navigate to the **Install DisplayLink Manager** window, click **Continue**.

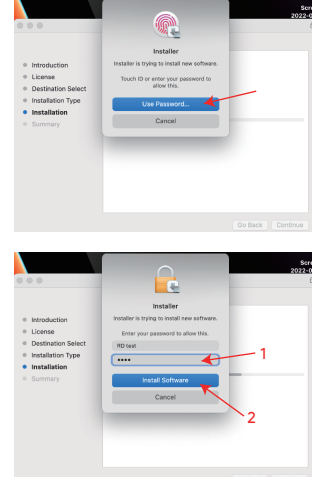

2. Click **Continue** to the next window, then click **Agree**.

6

3. Click **Install** and choose **Use Password...**, then enter the screen password and click **Install Software**.

4. Please wait patiently for the installation to complete then click **Close**.

7

5. If you have enabled notifications from DisplayLink Manager, it will remind you to allow screen recording when it detects that this permission is missing.

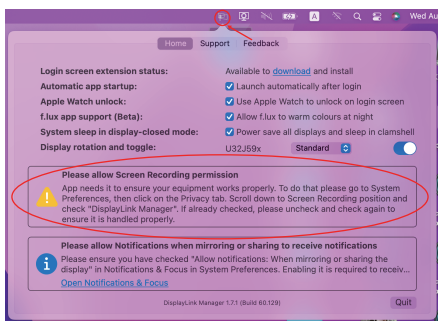

6. If you didn't get the notification from DisplayLink Manager, please click **Go** in the function bar at the top left of screen, then select **Applications** and click **DisplayLink Manager**.

8

7. Click the **DisplayLink Graphics** icon in the function bar at the top right of the screen, and the notification will also appear in the DisplayLink Manager window. A warning is found here, you should allow the screen recording permission for DisplayLink Manager.

8. Click the **Apple icon** -> **System Preferences**, then double click **Security & Privacy**.

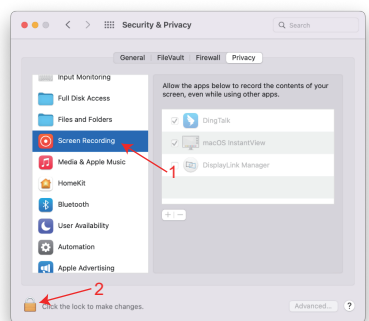

9

9. Enable **Screen Recording** to allow the **DisplayLink Manager** application to capture pixels and send them to your USB peripheral:

- 9.1 Select **Screen Recording** in **Privacy** tab.

- 9.2 Click the **lock** icon at the bottom left of the window to unlock.

10

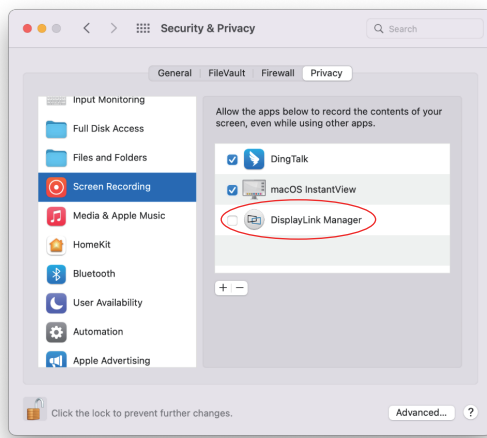

10. When the small window pops up, choose a password or use your fingerprint to unlock.

- 10.1 If you use password to unlock, and click **Use Password**, then enter your password and choose **Unlock**.

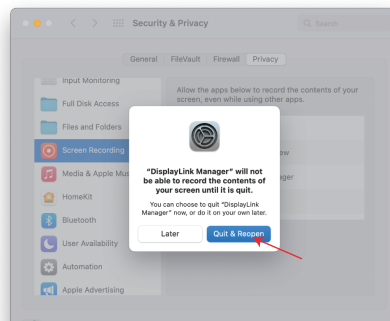

- 10.2 If you use fingerprint to unlock, it will jump directly to the next step.

11. Check the **DisplayLink Manager** in the right list.

11

12. Click **Quit & Reopen** to restart the driver, then you can click the **DisplayLink Graphics** icon in the function bar at the top right of the screen to ensure whether the warning has been lifted and whether the driver can work properly.

12

Hardware Installation

For Windows
