---

### Network Connection

This Hub is driver-free, so there is no need to install external
drivers. Before configuring, please connect your network device,
e.g. switch, router, DSL/Cable modem to the Hub's Ethernet port
via an Ethernet cable.

1. Right-click the **network** icon in the system tray and click
   **Open Network and Sharing Center**.

2. Click **Local Area Connection 2...**

4

---

3. Current connection speed will be displayed among the
   connection information.

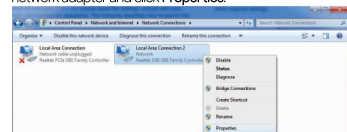

5

---

### Network Configuration

You should configure your Ethernet adapter as required
according to your network environment. If you are unsure about
the settings, consult with your network administrator for
assistance. The following describes how to launch the network
settings window for your Ethernet adapter.

1. Right-click the network icon in the system tray and click
   **Open Network and Sharing Center**.
2. Click **Change adapter settings**.

3. Right-click the **Local Area Connection** icon indicating your
   network adapter and click **Properties**.

6

---

4. Then the **Local Area Connection Properties** window appears
   for user to make required settings.

7
